

The Scholar's Backpack: Using virtual environments to support modern research practice.

Bret Davidson | Eka Grguric

NCSU Libraries

go.ncsu.edu/2017-c4l-se

Agenda

- Open science as problem space
- Open science as modern research practice
- Open science at NC State
- Scholar's Backpack

Open Science: what is it?

- Open Access
- Open Data
- Open Notebooks
- Open Source

Open Science is a return to first principles of scientific practice.

PHILOSOPHICAL
TRANSACTIONS:
GIVING SOME
ACCOMPT
OF THE PRESENT
Undertakings, Studies, and Labours
OF THE
INGENIOUS
IN MANY
CONSIDERABLE PARTS
OF THE
WORLD.

Vol I.
For *Anno 1665, and 1666.*

out Temple-Bar, and James Allestry in Duck-Lane,
Printers to the Royal Society.

Nullius in Verba

"Take nobody's word for it."

Open Science can
increase reproducibility.

Five Schools of Thought

by Sönke Bartling & Sascha Friesike

Editors, <http://book.openingscience.org/>

- Infrastructure
- Public
- Measurement
- Democratic
- Pragmatic

Why Libraries?

Aligns with core library values

- information access
- open peer review
- community-based knowledge creation
- the preservation and dissemination of research
- libraries are champions of open (open source; open data)

Libraries
are about
supporting their users

Academic Libraries

are about

supporting research practice

Ongoing disruption by digital
technologies in modern research
practice

Summer of Open Science Event Series

The NCSU Libraries Summer of Open Science is a series of workshops and meetups that support modern research practice through hands on skill building.

Researchers are increasingly using digital tools in a complex, increasingly open, scholarly ecosystem. This has created a technical skills gap for experienced and novice researchers alike. The Summer of Open Science is designed to address this skills gap.

INTRODUCTION TO THE COMMAND LINE INTERFACE

May 19, 2016
2:00 PM to 4:00 PM
At the **D.H. Hill Makerspace**, D. H. Hill Library

WEB SCRAPING WITH PYTHON

May 25, 2016
2:00 PM to 5:00 PM
At the **D.H. Hill Makerspace**, D. H. Hill Library

UNDERSTAND AND BUILD YOUR SCHOLARLY IDENTITY

Jun 2, 2016
10:00 AM to 12:00 PM
At the **Multimedia Seminar Center**, D. H. Hill Library

SCIENTIFIC COMPUTING WITH PYTHON AND RASPBERRY PI

Jun 7, 2016
2:00 PM to 5:00 PM
At the **D.H. Hill Makerspace**, D. H. Hill Library

BUILD YOUR SCHOLARLY WEBSITE THE EASY WAY

Jun 10, 2016
10:00 AM to 12:00 PM

Goals

- Hands on skill building
- Provide networking opportunities
- Increase visibility of library spaces & services

Skills

- Scholarly identity creation
- Scientific computing
- Building a website
- Data harvesting
- Code collaboration

The Planning Team

Representation from broad range of departments.

Ekatarina [Eka] Grguric (Project Lead)

NCSU Libraries Fellow, Digital Libraries Initiatives / User Experience

Lauren Di Monte (Project Manager)

NCSU Libraries Fellow, User Experience / Administration

Alison Blaine (Content Development)

NCSU Libraries Fellow, Digital Libraries Initiatives / Research & Information Services

Bret Davidson (Technical Lead)

Digital Technologies Development Librarian, Digital Libraries Initiatives

Jennifer Garrett (Community Development)

Research Librarian for Mgmt, Education, and Social Sciences, Research & Information Services

Summer of Open Science

- Workshops
 - Intro to the Command Line Interface
 - Web Scraping with Python
 - Understand and Build Your Scholarly Identity
 - Scientific Computing with Python & Raspberry Pi
 - Build Your Scholarly Website the Easy Way
- Events
 - Meetups
 - End-of-Summer Showcase

Scientific Computing with Python & Raspberry Pi

40 person waiting list

Interdisciplinary Need:
over 40 departments across ~16 colleges

Takeaways

- Libraries are well positioned to fill gaps in the curriculum
- "Open Science" attracted a range of disciplines
- High demand for introductory skill training, particularly coding
- Interest in interdisciplinary research sharing
- Summer presents interesting opportunities and challenges

Virtual Environments for Reproducible Computing

Technical workshops are
ripe for disaster.

What could go wrong?

- Images reset overnight
- Improper permissions
- Network connectivity issues
- Language Versions
- Missing packages

Instructor Challenges

- Inconsistent user environments
- Inconsistent course materials
- Provisioning is time consuming
- Difficult to collaborate

Student Challenges

- Data types and structures
- Module system
- Control Structures
- Exception Handling
- Working with file system
- Retrieve a web page with Requests
- Parse content with BeautifulSoup
- Generate a word cloud with matplotlib

Computing Tasks
vs.
Computing Environments

Rise of Scholarly Code

Researcher Needs

- Consistency across lab environments
- Ability to see results of code
- Consistency across time
- Ease of collaboration

Many Options

- Custom Operating System Images
- Custom Distributions, e.g. Anaconda
- Interactive Environments, e.g. Jupyter

github.com/NCSU-Libraries/scholars-backpack

The screenshot shows the GitHub interface for the repository `NCSU-Libraries / scholars-backpack`. At the top, there are navigation links for `<> Code`, `Issues 0`, `Pull requests 0`, `Projects 0`, `Wiki`, `Pulse`, `Graphs`, and `Settings`. Below these, a message states "No description or website provided. — Edit". A summary bar indicates `1 commit`, `1 branch`, `0 releases`, `1 contributor`, and the `MIT` license. Action buttons include `Branch: master`, `New pull request`, `Create new file`, `Upload files`, `Find file`, and `Clone or download`. A commit history table shows the initial commit by `bretdavidson` 23 seconds ago, listing files `ansible`, `code`, `.gitignore`, `LICENSE`, `README.md`, and `Vagrantfile`. The `README.md` file is selected, displaying the title **Scholar's Backpack** and a paragraph about modern research practice.

Scholar's Backpack

Modern research practice asks researchers to engage with information in new ways through the use of a rapidly changing array of digital technologies. The Scholar's Backpack will bring together a sampler of commonly used digital tools that support the research lifecycle in one virtual machine, both decreasing the overhead of locating, installing, and learning how to use new tools and improving the reproducibility of scientific computing environments.

Our Approach

- Vagrant for managing operating system
- Ansible for provisioning and configuration
- Anaconda for managing environments and packages
- Workshop specific resources

Easy!

1. Install Vagrant
2. Install VirtualBox
3. Clone project repo
4. ``vagrant up``
5. ``vagrant ssh``
6. Execute code!

This is reproducible computing!

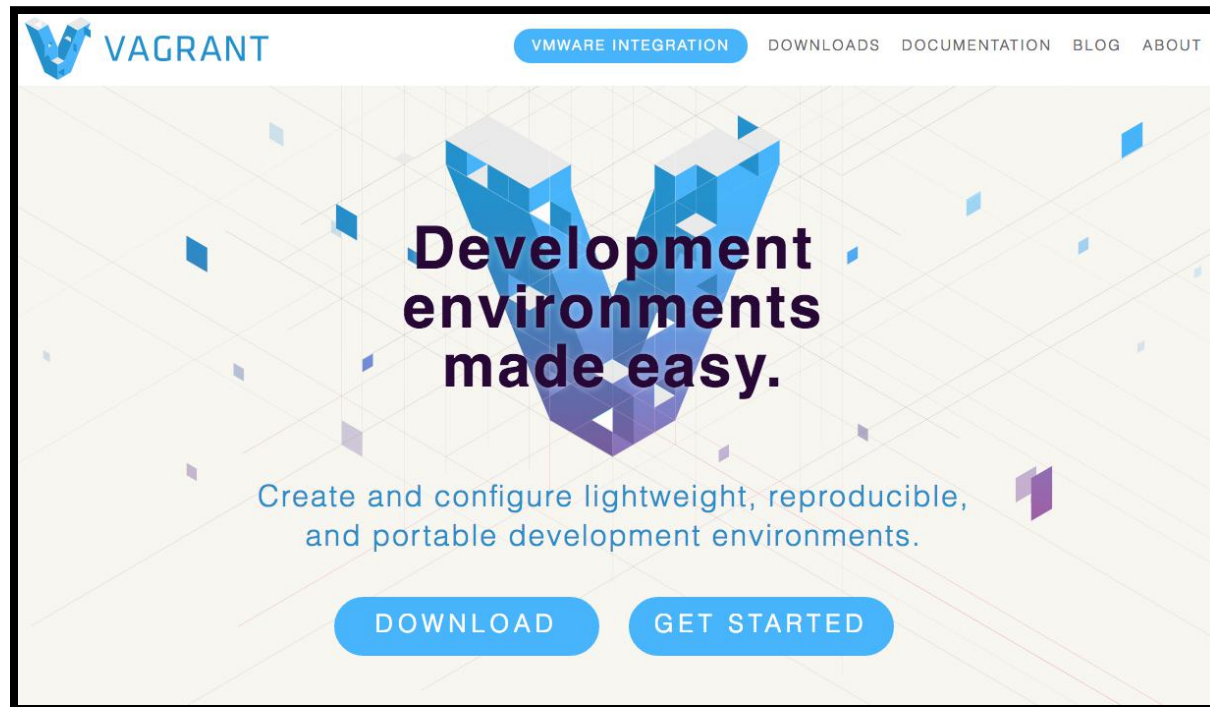

Benefits

- Consistent environment user to user
- Single target for course materials
- Faster provisioning for new workshops
- Repeatable course to course

Features

- Python
- R and R Studio
- Jupyter Notebook Server
- Example Notebooks
- Accessible from web browser

Vagrant

Create and configure lightweight,
reproducible, and portable
development environments.

Usage

- Easy installation through binary package
- Flexible configuration via **text-based configuration file**
- Single command: ``vagrant up``

Ansible

"Automation engine" for provisioning
and configuration management.

Provisioning

"Installation!"

Configuration Management

"Establish and maintain **consistency** of an environment."

Provisioning

- Anaconda
- Python & R
- Software packages
- Jupyter Notebooks
- etc.

Configuration

- Start Jupyter notebook server
- Set environment variables
- Set default login directory

Anaconda

ANACONDA
Leading Open Data Science Platform
Powered by Python

ANACONDA MAKES...

**DATA SCIENCE TEAMS
HAPPIER**

That means better and more results

Python Packages

astropy, beautifulsoup4, conda, flask, jupyter, matplotlib, numpy, nltk, pandas, pillow, pip, pytest, qt, requests, scipy, scikit-learn, seaborn, sqlite, etc.

R Packages

r, essentials, formatr, ggplot2, irkernel, knitr, kernsmooth, maps, markdown, mass, matrix, nnet, rbokeh, recommended, spatial, tidyr, etc.

 **jupyter** **Getting-Started** Last Checkpoint: Last Friday at 8:12 AM (autosaved) 

File Edit View Insert Cell Kernel Widgets Help Python 3 

Future Work

- Docker containers for portability
- Embedded use in curriculum
- Additional open source contributions

Summary

Open Science represents a new framework for research and provides an opportunity for libraries to engage researchers in new ways.

NCSU Libraries has done workshops and outreach around this framework and there is evidence of strong interest across disciplines.

We are redeploying existing technical resources and cutting edge technology in ways that used to be difficult or impossible.

This approach has helped us
identify a new leadership role for
libraries in open research
support.

Thanks!
